## **DETAILED ACTION**

### *Species Election*

1. This application contains claims directed to the following patentably distinct species:
  - (1) the probe is a nucleic acid or oligonucleotide or PNA or LNA or XLNT or biological molecule or small molecule (claims 7 and 40)
  - (2) the probe is a polypeptide or biological molecule or small molecule (claims 7 and 40)
  - (3) the probe is a lipid or sterol or biological molecule or small molecule (claims 7 and 40)
  - (4) the probe is a dye or small molecule (claims 7 and 40)
  - (5) the probe is a drug or small molecule (claims 7 and 40)
  - (6) the probe is a mass tag or small molecule (claims 7 and 40)
  - (7) the probe is an isotope or small molecule (claims 7 and 40)
  - (8) the probe is a microsphere or nanosphere or barcode particle, or nanocrystal (claims 7 and 40)
  - (9) the probe is any combination of (1) to (8) (claims 7 and 40)

The species are independent or distinct because these species have different properties and require different searches.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an

Art Unit: 1634

allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
